

Al-Ashraf Staggering And Super SAT's

Al Ashraf Primary School's former Year 6 have topped the league table with a phenomenal and exceptional result of 88 percent.

The SAT's took place on the week of 13th May 2013 and the results came out only 6 months after- November 2013.

One of the parents who was extremely stunned commented: "I cannot believe this tremendous and outstanding outcome. I did not even think Al Ashraf will be in the top three." A teacher added that she was highly impressed with these intelligent and bright children.

Miss Bhaimia the teacher of the former Year 6 class said that she was over the moon with her lovely children. Also one of the community members exclaimed that the community thought that Al-Ashraf Primary School would get a lower percentage of 35 but it turned out

completely differently.

Next we had an interview with the Head Teacher Mufti Abdullah Patel.

He Mentioned that all the effort put in the SAT's was like the three corners of a triangle:

- 1)Children Do The SAT's
- 2)Teachers/TA Help Prepare for them
- 3)Parents Make you learn at home

He also stated that he felt overjoyed, ecstatic and could not be much happier.

He then announced that there will be a lot of pressure set on the future Year 6's as the primary school have set extremely high standards.

We have to continue with the same method for achieving this high result, if a method gives you success why change it?added Miss Bhaimia the teacher of the former Year 6 and new Year 6.

The school is very happy and feel over joyed of its success, the key to success is good behaviour if you can control the behaviour you can control the class and if the class listens and respects the teacher they will learn and understand the lesson.
